It is a great learning resource

By Sandra Lee Hartsell

I have used Apologia Science for years. It is a great learning resource.

Awesome Book!!!

By jesusislord

This is a positively awesome book! I am a homeschool grad and college student and am currently using the book to CLEP BIOL 101. It's basically college level, written in a easy to read, excellent format. I have taken secular biology as well, and it is identical (scientifically). Your children will get an excellent overview of biology with this book. Don't listen to the reviews that discredit the scholarship of this book. You will learn everything with this book that you would learn with any other book that is steeped in evolution.

Yes, Wile's faith in our Lord and Savior shines through every word, and that is why it is so awesome! I believe that he gives those who choose to place their faith in evolution a great hearing, and shows why their view is not to be trusted. Notice I say that they "place their faith" in evolution. Atheism is no more or less dependent on faith than is Christianity. Science can only go so far. Science cannot say where a man's soul goes after he dies, nor can it describe the origin of the universe. Athiests believe by faith that the universe was formed by "The Big Bang" and they believe by faith that a man's life is ended when he dies. They don't know for sure. Faith takes them where reason can never go. How much better is our certain promise, that our Lord and Savior died for us, and is now seated at the right hand of God. He will return someday, and every knee will bow to him, and every tounge confess that He is Lord- even those who refuse to now.

If I have offended anyone, that means you needed to read this today! Confess that Jesus is Lord today, before it is forever too late.

In conclusion, this is an excellent biology book. If you are a born again believer in the Lord Jesus Christ look no farther!

Five Stars

By Nancy D Lewis

Well written and great for homeschool students. The labs are easy to do.
