Are you ready to integrate technology into your classroom? Instructional Technology and Media for Learning will guide you as you begin to incorporate computer technology and other media into your teaching. With its hallmark ASSURE technology integration model and classroom cases, this renowned text and its online resources guide you as you apply what you learn about computers, multimedia, Internet, distance learning, and Web 2.0 technologies to 21st Century classroom instruction.

This heavily revamped 10th edition invites you to integrate technology into your classroom:

Revised and Updated! The popular ASSURE model for technology and media integration, now introduced and explained in Ch. 3, is integrated throughout the book in the following features providing you with opportunities to practice applying the ASSURE model to today's 21st Century classrooms:

- ASSURE Classroom Case Studies, at the beginning of chapters, now brings the classroom to life through a

video clip of an authentic classroom.

- ASSURE Classroom Case Study Reflections extend the opening case study by stimulating thinking about questions that a teacher may face when considering technology integration in the context of the chapter information.
- ASSURE Lesson Plans, at the end of chapters, offer a fuller version of the ASSURE Classroom Case Study to examine the ASSURE model step by step within the context of a lesson.

Revised! A greater focus on 21st century living and the new directions that impact today's student learners help you learn how to best utilize technology and media to address your audience's interests and needs. (Ex. Ch. 2, Understanding 21st Century Learners)

NEW! Innovation on the Horizon features highlight a new, commercially available technology tool and its potential educational application.

Revised and Updated! Media Samples and new Free and Inexpensive Materials features present brief descriptions of technology and media applications in various contexts to make the reader aware of what is available for use in today's classrooms.

Revised and Updated! Using _____ in the Classroom, When to Use...., and Technology for Diverse Learners features provide helpful tips for using technology for effective classroom instruction for all learners.

New! Marginal annotations point to ASSURE Case videos, Selection Rubrics, web links, and an interactive chapter-by-chapter study plan available on password protected site. (For more information about purchasing access to this online resource please visit www.pearsonhighered.com.)

About the Author

Sharon E. Smaldino Sharon holds the L. D. and Ruth G. Morgridge Endowed Chair for Teacher Education in the College of Education at Northern Illinois University (NIU). She was a professor of educational technology at the University of Northern Iowa for many years prior to moving to NIU. Sharon received her PhD in 1987 from Southern Illinois University, Carbondale.

Prior to that she received an MA in elementary education and served for more than a dozen years as teacher, speech therapist, and special educator in school districts from Florida to Minnesota. At Northern Iowa she taught educational media courses for undergraduates and graduate majors and served as coordinator of the educational technology program. Sharon also taught graduate courses in instructional development, technology integration, distance education, and professional standards and ethical practice. She has received several awards for her outstanding teaching. In her current role, she is focused on working with faculty and PK—12 teachers to integrate technology into the learning process. Presenting at state, national, and international conferences, Sharon has become an important voice on applications of technology in the classroom and in distance education. In addition to her teaching and consulting, Sharon has written articles for state and national journals on her primary research interest—effective technology integration in learning. She worked on a teacher quality enhancement grant that identified technology as an important aspect of ensuring quality learning environments. She also served as the editor of TechTrends, an AECT publication.

Deborah L. Lowther Deborah has been an educator for 30 years. For the first seven years of her career she taught middle school science and was highly engaged with providing professional development to teachers within and beyond her district. Because of her desire to work with teachers, she received her PhD in educational technology in 1994 and accepted a

faculty position at the University of Memphis in 1995. At the University of Memphis, Deborah serves as the senior technology researcher for the Center for Research in Educational Policy, through which she investigates P–12 technology integration issues. She has personally conducted observations in P–12 classrooms and interviewed students, teachers, and principals in numerous

schools across the country. She has used the knowledge and experiences gained through engagement in applied research to develop the iNtegrating Technology for inQuiry (NTeQ) Model with Dr. Gary Morrison. This model has been the foundational approach for several high-profile technology initiatives, including Michigan's Freedom to Learn program and Tennessee's EdTech Launch program. With regard to scholarship, Deborah has coauthored several books, chapters, and refereed journal articles; presented at numerous national and international conferences; and has provided professional development to educational institutions across the nation.

James D. Russell Jim is Professor Emeritus of Educational Technology at Purdue University, where he taught for 38 years. Jim also worked part time for Purdue's Center for Instructional Excellence, where he conducted workshops on teaching techniques and consulted on instructional improvement. During fourteen spring semesters he was Visiting Professor of Educational Psychology and Learning Systems at Florida State University. There he also worked part time for the Center for Teaching and Learning. A former high school mathematics and physics teacher, Jim teaching career spans 45 years. He has won numerous honors for his teaching at Purdue, including his department's Outstanding Teacher Award and the School of Education's Best Teacher Award. He is also the recipient of AECT's Diamond Mentor Award. He was selected as a member of Purdue's Teaching Academy and has been inducted into the Purdue Book of Great Teachers. His specialty areas, in which he has achieved national prominence through his writings and presentations, are presentation skills and using media and technology in classrooms. Through his teaching, workshops, consulting, and this textbook, Jim has made a significant impact on classroom teaching practice.

Russell by on the internet can be also done easily every where you are. It seems that hesitating the bus on the shelter, waiting the list for line, or various other places feasible. This Instructional Technology And Media For Learning (10th Edition) By Sharon E. Smaldino, Deborah L. Lowther, James D. Russell could accompany you in that time. It will certainly not make you really feel bored. Besides, through this will additionally enhance your life quality.

INSTRUCTIONAL TECHNOLOGY AND MEDIA FOR LEARNING (10TH EDITION) BY SHARON E. SMALDINO, DEBORAH L. LOWTHER, JAMES D. RUSSELL PDF

With its hallmark ASSURE technology integration model and classroom cases, this renowned text places you squarely in the classroom while providing a framework that teaches you to apply what you learn about computers, multimedia, Internet, distance learning, and audio/visual technologies to the 21st Century classroom instruction.

Filled with examples drawn from authentic elementary and secondary education situations, this text paints a vivid picture of technology and media enhancing and supporting teaching and learning. The ASSURE cases are supported by video, guided reflection prompts, and lesson plans that demonstrate strong technology integration and lesson planning. In addition to preparing educators with best practices to incorporate technology and media to meet the needs of 21st Century learners, the book includes strong coverage of copyright concerns, free and inexpensive media resources, as well as learning theory and instructional models. The tenth edition updates reflect the accelerating trend toward digitizing information and school use of technologies, especially in the Web 2.0 era. The tenth edition also addresses the interaction among the roles of teachers, technology coordinators, and school media specialists, all complementary and interdependent teams within the school.

If You Have Almost No Knowledge of Educational Technology.

By D. Campbell

This book is more for the individual that has almost zero knowledge of technology and its use in the classroom. I already knew just about everything presented in this book. Though, it's difficult to fault the authors and the book itself simply because technology advances and changes at such a blinding fast speed that the task of staying updated is quite formidable, if not near impossible. It's not like a history or perhaps a math textbook.

I used it for a class I took but I barely consulted with it other than to cite it once or twice. Think hard before purchasing.

2 of 2 people found the following review helpful.

ok as long as you don't need the website

By Amanda A. Covey

I bought this book new but quickly discovered it didn't come w/ an access code. I had to spend another \$20 just to get a code to access the book's website for my class assignments which was really annoying! The book itself is ok. The chapters are not long which is nice. The chapters are also sprinkled with random information that while interesting I found incredibly annoying in the way the book was layed out. I'm giving this 3 stars mainly because it didn't come with an access code and I think it's a poor way of doing business by forcing people to spend even more money to get access to a website of a book that's already over priced.

Very upset

By JoDee Crain

I was given a Kindle Reader for Christmas. I tried to download this BOOK on my reader as that is supposed to be what they are for. I was not allowed to download this on my reader. I ended up having to go and spend additional money to get a Kindle Fire in order to download the books. I am sorry but I feel that if you are going to sell a book, it should be available to read on all of your devices considering that is what you are selling.
