Great study tool for Micro and ID

By Monster

Love these cards! They are so complete with clinical vignettes, epidemiology, clinical signs, pathogenesis, lab diagnosis, and treatment and prevention for all the major infectious agents. Plus, they have a set of cards based on symptoms, i.e., GI upset, with a list of all the things that could cause it, from viruses to fungi. Another reviewer complained that they don't have tabs to organize them, which is true, but they are in order, are numbered, and come with both a table of contents card and an index card, so I found them very well-organized as long as you keep them in order (and again, they are numbered, it's not that hard). As a medical student, these are great.

Purchased two different flashcards...

By Philip John Swink

I purchased these and Lippincott's micro cards. Did not end up using these cards as much as the colored Lippincott's cards. Information wasn't broken down that well and didn't like they weren't colored.

I used these cards when my brain couldn't handle looking at first aid or Uworld questions anymore. They were super helpful.
