Yeah, on the internet publication Sight (Library Of The Five Senses & The Sixth Sense) By Franklin Watts, Franklin Watts is a sort of digital e-book that you could enter the link download provided.

From School Library Journal

PreS - K A book about vision that will not awaken young minds to the wonders of seeing. The illustrations show frightened looking children staring in different directions. It appears that they are unable to focus their eyes on the object mentioned in the text. The illustrations are accompanied by dull, repetitious sentences: "See the. . ." and "Look at the. . . ." Also, it's disturbing to find young children directed to "See the sun." The book does offer an adult appendix with a diagram of the eye and a technical explanation of how the eye works. However, the authors fail to tell how to relate this information to children. A. Elizabeth McAuliffe, Williston Park Public Library, N.Y.

Preschool Teacher Must Have!

By A Customer

There are just enough words on a page to get the message accross without your pre-schoolers losing interest. At the end of the book there is a nice diagram of the parts of the eye and brief discriptions of their functions. A must have. I am looking forward to owning the rest of the series on the senses.

Engaging pictures and text for little ones

By Deb A

I used this series of books with a daycare class. The kids loved them. The pictures are engaging, and the text is a fun way to introduce children to the senses. Each book contains further pictures and explanations about the mechanics of the body, i.e. the nose, ears, tongue, which are great for children who are still curious when

the book is done.

Five Senses

By Gloria Haynes

A fun and entertaining way to present the sense of sight to a classroom full of preschoolers, along with some hands on activities, it's a good resource for our teachers.
