Mark Kurlansky, beloved award-winning and bestselling author, offers a riveting, uniquely illustrated, narrative nonfiction account for kids about what's happening to fish, the oceans, and our environment, and what kids can do about it.

World Without Fish has been praised as “urgent” (Publishers Weekly) and “a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea” (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum.

Written by a master storyteller, *World Without Fish* connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, and swordfish, could disappear within 50 years, and the domino effect it would have—oceans teeming with jellyfish and turning pinkish orange from algal blooms; seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen and scientists. It covers the effects of industrialized fishing, and how bottom-dragging nets are turning the ocean floor into a desert.

The answer? Support sustainable fishing. *World Without Fish* tells kids exactly what they can do: Find out where those fish sticks come from. Tell your parents what's good to buy, and what's not. Ask the waiter if the fish on the menu is line-caught. And follow simple rules: Use less plastic, and never eat endangered fish like bluefin tuna.

Interwoven with the book is a graphic novel. Each beautifully illustrated chapter opener links to form a larger fictional story that complements the text. Hand in hand, they create a *Silent Spring* for a new generation.

Awesome

By D. Demoin

This book is great for a young scientist or avid reader who wants to read something, be entertained by the story, and learn some key concepts about science. Great for struggling readers too. This book would be great in a classroom to help students see the cause and effect relationship of humans on our world, as well as helping students see that their opinion and thoughts matter. Consumerism is also touched in this book along with graphic novel pages to summarize each chapter and help synthesize student's knowledge before moving to the next chapter.
